This workshop will discuss the options for high-altitude aircraft for Europe in the future. It is part of the EUFAR network activity N3FF 'future of the fleet'. As output from N3FF, we prepare a white book that will summarise our recommendation for a stratospheric aircraft. We invite all interested scientists, aircraft operators and representatives of funding agencies and potential users to discuss user needs and the options.

### 3. Agenda

<i>Time</i>	<i>Meeting description</i>	<i>Location</i>
	<b>Meeting name</b>	
14:30	<b>Airborne stratospheric research in the past and future plans – user needs / white book</b> (C. Schiller)	
15:00	<b>The XCOR Lynx spaceplane</b> (G. Smith)	
15:30	<b>Coffee break</b>	
16:00	<b>The M55 Geophysica high altitude aircraft</b> (B. Lepukhov, G. Belyaev)	
16:30	<b>The NASA high-altitude aircraft WB 57, ER-2 and Global Hawk</b> (R. Curry)	
17:00	<b>Understanding the Earth’s atmosphere better with unmanned aircraft systems</b> (J. Elkins)	
17:30	<b>General discussion on future high altitude aircraft in Europe</b>
